Inhalt

1 Einleitung	1
2 Auftrag	1
2.1 Analyse	1
2.2 Fragen	1
3 Evidence-informed design	2
4 Literatur	2
Literatur	2

1 Einleitung

This handout demonstrates the PHBern page header, hierarchy, callouts, tables, citations, cross-format website links, and the protected-resource marker.

Zeitbudget

Plan approximately 30 minutes for this compact example.

2 Auftrag

2.1 Analyse

Read the short **free example resource** and compare it with the  **protected example resource**.

The rendered PDF turns both relative paths into links under the `website.site-url` configured in `_quarto.yml`. The protected link also receives a lock marker.

2.2 Fragen

1. Which information belongs in a course website?
2. Which information should remain in a protected institutional system?
3. How would you explain the difference to students?

Grundsatz

A visual lock marker communicates restricted intent; access control must be implemented by the publishing platform.

3 Evidence-informed design

Use citations in the ordinary Quarto form. For example, multimedia design should manage cognitive processing rather than simply add media (Mayer 2021).

Decision	Question
Text	Is every sentence needed for the task?
Image	Does it explain, orient, or motivate?
Interaction	What should learners think or produce?
Link	Will the target remain reachable after export?
